

CareGeo

◆ Built in Idaho, with working reshab providers

HOME-CARE MANAGEMENT · FEATURE BOOK

Every visit verified. Every record audit-ready.

One platform for Idaho reshab, PSR & DD agencies — GPS-verified EVV, automatic service documentation, payroll from real punches, and a compliance system built for IDAPA survey.

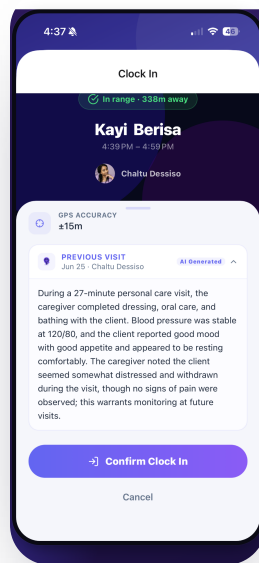

[caregeo.app](#) · [book a demo](#) [385-253-2318](#) · text or call hello@gorevamp.ai

01 EVV & GPS Verification

The core promise: no visit is real until it's verified. CareGeo confirms your caregiver was physically at the client's home, at the right time, and captures every data point the 21st Century Cures Act requires — automatically, at clock-in.

Without it: paper timesheets nobody can verify, no proof of location, and Medicaid claims exposed to denial or audit.

- ✓ **Geofenced clock-in / clock-out** — the app only lets a caregiver clock in inside the client's geofence; presence is confirmed and recorded.
- ✓ **All 6 required EVV data points**, every visit — type of service, individual served, date, location, individual providing, and start/end time.
- ✓ **Immutable records** — every EVV entry is locked once created; corrections are logged, never overwritten.
- ✓ **Offline-first** — captures in the field with no signal and syncs automatically when back online.
- ✓ **Optional clock-in photo verification** and a live map of every caregiver currently on a visit.
- ✓ **Audit-ready aggregator exports** for the state — always.

In-range, GPS-verified clock-in — the caregiver can't start until they're inside the client's geofence.

02 The Caregiver App

Built for the people who do the work — one-handed, fast, and forgiving, so documentation happens *during* the visit instead of from memory later.

■ Live visit capture

Log tasks, vitals, medications, notes, and photos as they happen — with instant "saved" confirmation and haptic feedback.

■ Automatic GPS mileage

Miles between visits tracked by GPS — no manual logs, ready for reimbursement.

■ Push notifications

Shift assignments, clock-in reminders, and messages from the office — on their phone.

■ Daily service documentation

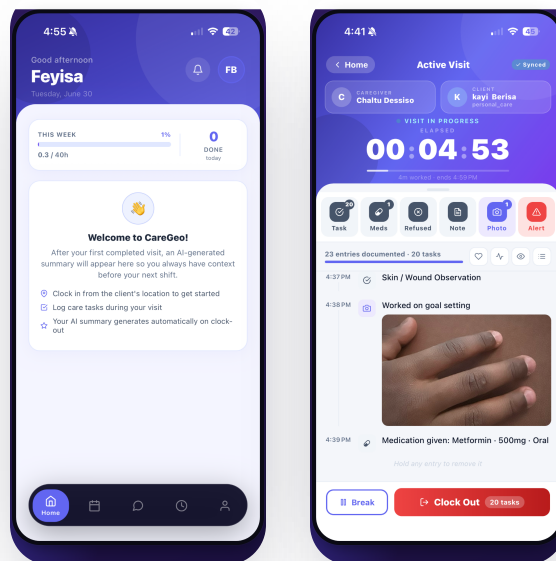

A tap on **Log** fills out that day's service record and writes it straight into the week's compliance documentation.

■ Schedule & availability

Caregivers see their shifts, set availability, and (if enabled) request visits for clients they've served.

■ Works offline

Everything captures without signal and syncs later; caregivers always know it saved.

The home dashboard and the live Active Visit screen — clock, tasks, meds, vitals & the daily log, one-handed.

03 Compliance – Built for Survey

This is where CareGeo separates from generic home-care software. The compliance module is modeled on the Idaho reshaping record itself — the exact forms, IDAPA citations, and due dates a surveyor checks.

- ✓ **Participant record, in binder order** — Annual Review checklist, Participant Profile, Incident/CIR, Weekly Service Documentation, Progress Review, and Coordination — each with its IDAPA citation and status.
- ✓ **Service Coordination log** — track calls, emails & notes with the SC and guardians — your evidence for reciprocal communication.
- ✓ **One-click Audit Packet** — a surveyor-ready PDF of a participant's record on demand.
- ✓ **QIDP Progress Review** — turns daily-log response codes into per-goal trends (progress / regression / independence) with a digital sign-off, mapped to 16.04.17.202.04.d.ii.
- ✓ **Agency credentials** — certification & insurance with expiration tracking and an automatic **90-day re-survey alert** so you never miss the window.
- ✓ **Compliance dashboard** — a live score, what's overdue, common gaps, and the participants who need attention.

The Incident / Accident / Illness report — IDAPA 16.04.17.400.08, built right into the participant record.

Why it matters: agencies don't buy software — they buy **passing their survey** and keeping their certification. CareGeo is the only tool in this niche built around that outcome.

04 Payroll & Billing

Pay and bill from verified visits — not from a spreadsheet. Because every hour comes from a GPS-verified punch, payroll math stops being a pay-period ordeal.

■ Payroll from EVV

Hours and gross pay calculated automatically from verified punches, reviewed as a draft before anything is finalized.

■ Export to your processor

One-click exports for QuickBooks, ADP & Gusto — no re-keying hours.

■ Bill by support level

Daily or hourly billing by level (Intense / High / Hourly) with the rate and code applied to invoices automatically.

■ Overtime & differentials

FLSA overtime, plus per-caregiver day/night rates and weekend, holiday & service-type differentials — each itemized.

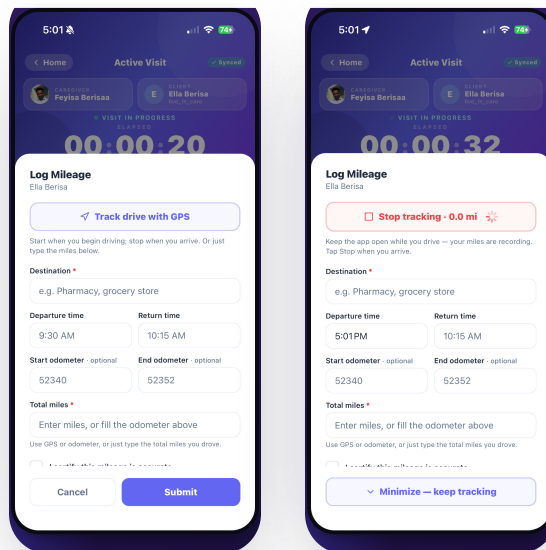

■ Flexible caregiver comms

Choose what caregivers get at payroll: a full earnings summary, hours only, or nothing — your call.

■ Bill from the DSL

Verify service data before billing — the record and the claim come from the same source of truth.

NEW Automatic GPS mileage

The drive between visits is tracked by GPS and totaled automatically — no manual logs, ready for reimbursement.

05 Scheduling, Family & Office

■ Scheduling that fits reshab

- ✓ Assign visits by client, caregiver & time — calendar, day, or list view.
- ✓ **Cover marketplace** — caregivers request to drop or swap; the office approves or reassigns in a tap, with notifications.
- ✓ Optional **self-scheduling**, gated to clients a caregiver has served, flagged for your review.

■ Family Portal

- ✓ A private link — **no app to download** — for guardians and family.
- ✓ **AI visit summaries** generated automatically at clock-out and shared with the family.

■ Admin dashboard & reports

- ✓ Live view of today's activity, active visits, and who's clocked in on a map.
- ✓ Incident management with automatic escalation of high-severity events.
- ✓ Hours, visits & attendance analytics — and **"Ask Mie,"** an in-app assistant that answers "how do I..." for your staff.

The screenshot displays the CareGeo web interface, specifically the Compliance section for a participant named Feyta Berica. The interface features a sidebar with navigation options such as Dashboard, Messages, Live Map, EVV Records, Incidents, Compliance, and PEOPLE (Clients, Employees). The main content area shows a 'Statement of Participant's Response to Service' form. The form includes a legend for various service categories (1-18) and a grid for tracking activities across different shifts (Graveyard, AM, PM) and days of the week (SUN, MON, TUE, WED, THU, FRI, SAT). The form also includes a 'Print / Save PDF' button and a 'Back to weekly logs' link.

CareGeo on the web — the office view of live activity, compliance & scheduling.

06 Security & Plans

Compliance-grade from the ground up. A signed Business Associate Agreement is included on *every* plan.

- ✓ **HIPAA compliant**, hosted on Google Cloud with a signed BAA on every plan.
- ✓ **PHI encrypted** at rest (AES-256) and in transit (TLS 1.3).
- ✓ **Immutable EVV** records and audit logging of sensitive access.

07 Simple, Transparent Pricing

Starter

\$99/mo

Up to 10 employees. HIPAA storage, EVV & geofencing, automated payroll, and the CareGeo mobile app.

MOST POPULAR

Growth

\$199/mo

Up to 50 employees. Everything in Starter, plus care plans, family portal, AI visit summaries, invoicing, incident reports, broadcast messaging & priority support.

Pro

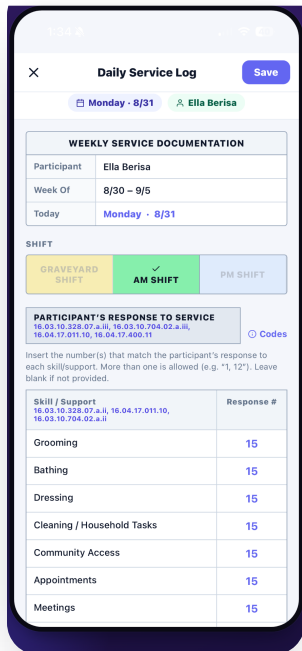

\$299/mo

Unlimited employees. Everything in Growth, plus custom reports, multi-location, white-label family portal, dedicated onboarding, phone support & SLA.

Every plan includes: HIPAA-compliant storage · EVV & geofencing · automated payroll · the CareGeo mobile app · a signed BAA.

08 See CareGeo in Action

The whole day in the caregiver's hand — request a visit, follow the schedule, document the visit, and log the miles.
